

# baby room thermometer

*..check that your baby's bedroom is a safe ideal temperature*

These thermometers provide added safety and reassurance to parents and carers, from the time a baby is born and through their early years, helping to ensure a childsafe environment.

This new range is manufactured in the UK and incorporates the latest liquid crystal technology, using a unique accurate and easy to read red moving thermometer scale.

## Room Thermometers

These room thermometers are quick and easy to read, and ensure that a baby's bedroom or nursery is kept at a safe temperature.

It is important to check that your baby does not get too hot or too cold; to reduce the risk of discomfort or cot death, temperature control while a baby is sleeping is particularly important.
