

baby safety feeding spoons

babysafe®

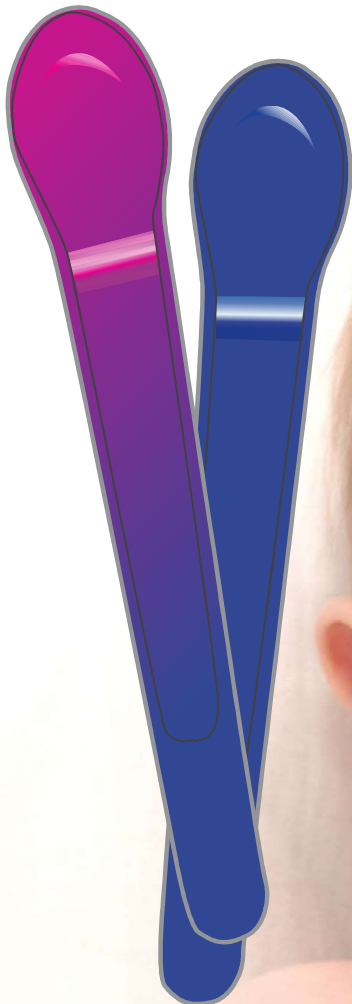

..spoon changes colour if food is too hot

Feeding Spoons

Overheating baby food is a common problem and using a safety spoon which changes colour will show quickly if the food temperature is too hot for a baby's mouth. The spoon changes from blue to pink if food is too hot, giving reassurance to parents and carers.

Manufactured in the UK using the latest BPA-free thermochromic technology.

Other colours of spoons are also available.
