

# feverline®

## Return-to-work Fever Temperature Monitoring

As COVID-19 restrictions are lifted **feverline®** Forehead Temperature Fever Indicators are ideal for monitoring staff returning to offices, schools, factories or even while remaining at home

A fast, simple temperature monitoring system to accurately show trends in core body temperature

- Monitor Temperature Trends
- Ideal for adults and children
- Accurate to +/- 0.5°C
- Unbreakable, easy to use
- Non-invasive, quick reading
- CE certified to European 93/42/EEC Medical Devices legislation standards
- Disposable or Reusable available
- Latex-Free
- Core Adjusted Temperature

CE 2797

Conforms to ISO 13485 2016

Our **feverline®** liquid crystal technology has been used by hospitals to monitor patient temperature trends for over 20 years. A calculated offset is used to estimate the core body temperature compared to the forehead then, by establishing a “healthy” reading this can be compared with a current one and a trend established. Any increase in core body temperature is quickly indicated.

As the COVID-19 lock down is gradually lifted, regularly checking staff for potential fever is recommended. These products below will quickly allow staff to identify if their temperature rises above normal, allowing immediate action to be taken and helping reduce the risk to others in the workplace and at home.

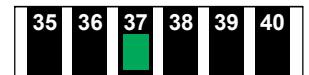

These thermometers indicate temperature after just 15 seconds and are simple to use for anyone.

### Disposable

Moving Line	
Product Reference:	LMLHHAL033D01B1** LMLHHAL033D01B4*
Description:	Moving Line Thermometer, adhesive backing
Size:	38mm x 12mm
Scale:	°C
Range:	33 to 41°C
Packaging:	Supplied in bags of *10 or **100 thermometers with instructions

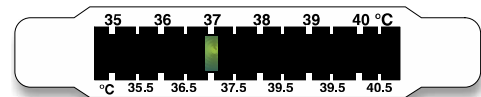

6 Temperature	
Product Reference:	L06HFEV035C01B2* L06HFEV035C01B1**
Description:	6 Event Disposable Thermometer, adhesive backing
Size:	46mm x 11mm
Scale:	°C only
Range:	35 to 40°C
Packaging:	Supplied in bags of *10 or **100 thermometers with instructions

### Reusable

12 Temperature	
Product Reference:	L12HHAL035C01L1
Description:	12 Event Reusable Thermometer, non adhesive
Size:	95mm x 19mm
Scale:	°C only
Range:	35 to 40°C
Packaging:	Supplied individually with instructions in vinyl sleeve

6 Temperature	
Product Reference:	L06HHAL035D02L1
Description:	6 Event Reusable Thermometer, non adhesive
Size:	89mm x 19mm
Scale:	°C and °F
Range:	35 to 40°C
Packaging:	Supplied individually with instructions in vinyl sleeve
